SUMMARY

Product Manager with 7+ years building digital products, first from UX and engineering and then leading product in fintech. I have owned lending, payments and loyalty products end to end: user research, discovery, PRDs, prioritization with Tech (front and back end), Data and Risk, A/B tests, go-to-market and measurement, reporting to founders and the CEO. Experience implementing credit bureau checks, KYC and integrations (WhatsApp, payments), and bank loyalty programs with up to 100K users.

PROFESSIONAL EXPERIENCE

Product Manager · Propaga 11/2025 – 09/2026 · Mexico

Lending fintech for small retailers, partnering with distributors

- Launched cash credit end to end, from a WhatsApp pilot to a web experience with Tech, Ops and Risk, **cutting application time from 7 to 1.5 min and disbursement from 24 h to 15 min**.
- With Risk, lowered **payment default from 15% to 5%**; implemented credit bureau checks, KYC, identity validation and AI-based scoring with alternative signals.
- Improved **Q3 retention by 18%** and **reactivated 30% of an inactive user base**; ran A/B tests on communications and registration.
- Led multichannel acquisition and activation (Meta Ads, WhatsApp and SMS) with CAC by channel: **+80% users in one month and 70% activation by week 3**.
- Set up the first Mixpanel tracking with Tech (funnels and session replays) and **cut registration time by 40%**.
- Redesigned the payments portal as self-service (**−30% operational load**) and improved the back office so Ops could find each user, their pre-approval and their registration step.
- Defined Propaga's first app, **launched on Google Play**, with phone-number sign-in and purchases across multiple distributors, enabling **cross-selling**.

Sr. UX Engineer · Fidelity Marketing 07/2023 – 11/2025 · Mexico

- Led web loyalty programs for Banamex (~100K users), Santander (~40K) and BanBajío (~30K), and apps for Arca Continental (Coca-Cola Leaders) and Holcim: flows, UI and product rules.
- Redesigned sign-in and redemption for Citibanamex Private Concerts, with seat selection on a map: **first-time login success from 25% to 57%**, seats from 3,150 to 8,200 and −22% redemption time.
- Delivered Santander's first mixed payment (points + money) and peer-to-peer points transfer, and integrated supplier catalogs such as Apple.
- Designed and built the internal CMS (content, segmentation and redemption rules for every program) and ERPs for gift cards and automatic folio assignment.
- Redesigned Holcim's loyalty plan over ~6 months: tiers, user types, catalog, registration and redemption.

UX/UI Designer · Wakkamole 01/2021 – 07/2023 · Mexico

- Redesigned the e-commerce purchase funnel, **reducing cart abandonment by 30% and checkout time by 35%**.
- Delivered 20+ digital products for 10+ brands, including Café Punta del Cielo's e-commerce and holiday campaigns for LEGO and Juguetrón.
